Georges & Son, Inc.
Foot Specialists,
1214 F Street N.W.

Deerfoot

Farm Sausage not only have the flavor, but also the nutritive value you require.

A tempting and substantial breakfast dish.

You'll find that all the best restaurants serve them.

AMUSEMENTS

"The Lila Domino."

Andreas Dippel will present "The Lila Domino" for one week at the Belasco Theater beginning next Monday evening, with matinees Wednesday and Saturday. Unqualified praise and glowing bouquets have followed this production across the country, repeating the plaudits which it won in New York city, Boston and Washington last season.

The cast includes some of the finest voices in the country. Among them are Bradford Kirkwood, Yvonne Darle, Amoria Farrar, Robert O'Connor, Joseph Carey, Harry Hermess, Mlle. Andree Corlay, George Broderick, George Curzon and Archibald Gilchrist. There is a chorus of fifty girls of the peach-blossom variety. There is fun and merriment in a bewitching manner and display gorgeous costumes that are a fashion show in themselves. There is fun and merriment in a bewitching manner and display gorgeous costumes that are a fashion show in themselves. There is fun and merriment in a bewitching manner and display gorgeous costumes that are a fashion show in themselves.

Ford's Name on Michigan Ballot.

LANSING, Mich., January 6.—The name of Henry Ford, who recently returned from his European peace mission, has been placed on the republican presidential primary ballot in Michigan this spring. Enough petitions to make possible Mr. Ford's candidacy for President were filed with the secretary of state yesterday afternoon.

To Prevent the Grip.

Quinine is the best way to prevent the grip. There is only one "BRONX" QUININE. E. W. Grove's signature on box. 25c.

WAR OFFICIALLY REPORTED

RUSSIAN STATEMENT.

PETROGRAD, January 5, via London, January 6: Western (Russia) front: South of the Pripiet, in the region of Koukotsk, Kavolva, we repulsed the Germans. In the region of the middle Stripa we have consolidated the positions won. Attempts by the enemy to retake the works he previously lost were repulsed, with great enemy losses. Northern front: Zernovitz sharp fighting continues. We have taken further hostile positions. The enemy's counter-attacks were repulsed by fire which inflicted huge losses. One of our units in this region captured 18 officers and 1,043 men and 4 machine guns. Caucasus front: In the region of the River Arkhava our fire dispersed the Turkish concentrations near Patadiour and demolished Turkish blockhouses in many sectors.

BELGIAN STATEMENT.

PARIS, January 6: While the Belgian artillery attacked German batteries to the east of Dixmude the enemy bombarded the village of Neuve Chapelle. Fighting with grenades has been violently resumed in the sector of Steenstraete.

BRITISH STATEMENT.

LONDON, January 6: Last night's official report reads: On the southern portion of our front the artillery on both sides has been more active than usual. Early this morning a hostile attack, made on one of our advanced posts near Mari-court, was driven off by rifle fire. A number of our aeroplanes carried out a successful bombing raid against the enemy's aerodrome at Douai. German aeroplanes today flew over Boulogne and dropped a few bombs. No damage was done.

ITALIAN STATEMENT.

ROME, January 5, via London, January 6: January 3 two Austrian aeroplanes flew toward Verona, but were beaten back by the fire of our batteries before reaching their objective. They fled northward, dropping bombs harmlessly. In the zone of Monte Croce and Val Comelico (Cadore) our artillery fire, concentrated on a camp in the Fieslein valley, forced large detachments of the enemy to retreat in the direction of Moos. On the Carnia front the fire of our batteries demolished several trenches and put the defenders to flight. On the Carso plateau the enemy again attacked our positions on Monte San Michele, and again were repulsed with losses.

AUSTRIAN STATEMENT.

VIENNA, January 5, via London, January 6: Russian war theater: In east Galicia and on the Bukovina frontier our troops at all points were victorious again yesterday. On the Bessarabia front, during the first hours of the afternoon, the enemy again opened a very strong artillery fire. Once more an infantry attack was directed against our positions near Toporoutz, but at the frontier of the empire east of Raraneze. The enemy at some points advanced to the limit of attack close to our position. His columns collapsed before our obstacles, but a majority of them already had entered the trench. The Croatian and South Hungarian regiments distinguished themselves in the tenacious resistance under most difficult conditions. The Russian attacks against the bridgehead near Usciebnik and in the sector of Jaslowice also shared a similar fate to those near Toporoutz. Farther north there were no important events.

Italian war theater: In consequence of the clearer weather the artillery activity yesterday afternoon was more vigorous along the entire front of the coastal district, especially in the Krn district. Near Oslavia it reached its highest violence. A fresh attack against a trench which our troops had captured north of Dolje and in hand-grenade attack on our position north of Monte San Michele were repulsed. Our men dropped bombs on military buildings at Ala and Strigno. Southeastern war theater: The situation unchanged.

The Austrian statement sent via Berlin reads: Russian attacks against the bridgehead at Toczienak and in the Justovje district equally failed.

On the Isonzo front the artillery was active, especially in the Krn district and near Oslavia. The Italians again attacked without success. The Croatian and South Hungarian regiments held fast under the most difficult circumstances. Russian attacks against the bridgehead at Toczienak and in the Justovje district equally failed.

The Croatian and South Hungarian regiments held fast under the most difficult circumstances. Russian attacks against the bridgehead at Toczienak and in the Justovje district equally failed.

FRENCH STATEMENT.

Yesterday's French official statements: Between Soissons and Rheims our artillery attacked opposing batteries and inflicted heavy damage upon the works of the enemy in the region northwest of Vailly. In Champagne we directed destructive bombardments against various exposed points on the enemy's front. These bombardments caused havoc in the German trenches and blew up munitions depots. During the course of the night, after a Russian bombardment, the German delivered a rather strong attack against our trenches between hill 193 and Butte de la Selve. They were completely repulsed. There has been no important event on the remainder of the front.

STONE IS TO BE USED IN INTERIOR BUILDING

Treasury Officials Decide Brick Would Not Be Appropriate Material.

The new building for the Department of the Interior, now in course of construction, is not to be faced with 1,200,000 brick of red hue, as desired by Secretary Lane of the Interior Department, nor of warm gray color, as required in the original specifications. It is to be of stone, to give it the monumental effect proper to a government building in the capital of the nation. The stone is to be light limestone.

The substitution of stone for brick will cost the government an added \$200,000 and cause some delay in construction. Even so, the cost will be well within the appropriation. The winning bid on the structure was approximately \$1,900,000, whereas there is about \$2,500,000 available for construction from appropriations already made.

Assume the Responsibility. Secretary McAdoo and Assistant Secretary Newton of the Treasury Department assume the responsibility for altering the facing of the planned structure from brick to stone. They considered that a government building in Washington, rather than the Cross-Corner post office, demanded monumental treatment.

The change will make small alterations in the structural design, which lends itself to stone as readily as to the brick facing originally planned. The few changes will be made necessary by the physical differences in the material.

But there is to be no garden lunch-room, sun parlor, rest and recreation hall on the roof. This was a feature much desired for the new building which is to house so many thousand employees of Uncle Sam. But the bids for construction were so greatly in excess of the estimates of cost made by the office of the supervising architect that the only practical thing to do appears to have been done—omit the roof garden.

Cost of Steel Big Factor. Steel-soaring in price—it is assumed, altered that a government building in Washington, rather than the Cross-Corner post office, demanded monumental treatment.
